Skilled software engineer with a strong passion for creating innovative and user-friendly applications. Excited to continuously learn new programming languages, techniques, and collaborate with diverse teams to deliver exceptional products. Professional Experience:

Software Engineer - Present - Developed and maintained dynamic web applications using JavaScript, HTML, and Tailwind, ensuring optimal user experiences. - Collaborated with cross-functional teams to create and enhance large-scale applications, most notably contributing to the Musik application detailed at the bottom of my resume.

Education:

Full Stack Flex Development Bootcamp Certification

Rutgers, The State University of New Jersey 57 US Highway 1, New Brunswick, NJ 08901-8554

Expected Graduation: November 22nd 2023

High School Diploma

Mainland Regional High School 1301 Oak Ave, Linwood, NJ 08221 Graduated: 2014

Skills:

Programming Languages: Python, JavaScript

Web Development Frameworks: Tailwind, React Databases: MySQL, MongoDB

Soft Skills: Effective Communication, Team Collaboration, Problem-Solving, Attention to Detail

Relevant Projects:

Musik Application <https://github.com/HunterMuratore/Musik>

This is my most recent full stack project. The idea behind this project was a social media platform similar to Instagram that focused on music and music sharing. Instead of pictures, users could use the Spotify API to find songs that they are listening to and share with other users. I have plans to add commenting and favoriting features in the near future.

My role in this project was mostly in back end development, creating most of the logic for the website. I also assisted in using Tailwind to design the website to get our sleek modern design.
